3.2 • HAZARD MITIGATION PLAN

Acting Community Development Director Sonia Southwell introduced Ken Goettel, the consultant who had worked with staff on Lakewood’s Hazard Mitigation Plan. Mr. Goettel displayed slides and provided an overview of the Plan. He stated that the Plan was an educational document that assessed the types of hazard the community could face and the risk they posed. The Plan outlined positive actions that could be taken by the City to reduce risks. He noted that the most likely hazards were natural ones such as earthquakes or flooding and that the objective of the plan was to make the City more disaster resistant and resilient. It was the recommendation of staff that the City Council adopt the proposed resolution to approve the Hazard Mitigation Plan and direct staff to submit the document to the California Office of Emergency Services and the Federal Emergency Management Agency for review and approval.

Mayor Rogers inquired about the seismic rating of earthquakes used in the vulnerability assessment of dam failure. Mr. Goettel stated that the inundation map did not use a specific earthquake rating formula and that while flood impacts on levees were measured in hundreds of years, for dams, it was measured in thousands of years.

She reported that notification had been received from the California Department of Housing and Community Development (HCD) that the use of the term “land banking” would preclude Lakewood from receiving funding under the Program. The proposed use of the funding would be for the acquisition of foreclosed and abandoned residential properties that would be demolished and developed into affordable housing units at a later date. At the recommendation of HCD, the application has been amended and a new resolution prepared for re-submittal. It was the recommendation of staff that the City Council conduct a public hearing to receive any public comment on the amendment to the application and then to adopt the proposed resolution which would amend the application for funding.
