It was the recommendation of the Planning and Environment Commission that the City Council introduce Ordinance No. 2006-1 amending the Lakewood Auto Center Specific Plan.

1.2 • PURCHASE OF MOBILE COMMAND POST AND COMMUNITY RESOURCE VEHICLE

Deputy City Manager Sandi Ruyle displayed slides and gave a brief presentation based on the report contained in the agenda. She stated that a review of the City’s Emergency Operations Plan had revealed the need for an emergency operations center that could be mobilized at the site of disasters. The proposed Mobile Command Post and Community Resource Vehicle had been designed in conjunction with the Sheriff’s Team Lakewood to contain the features and communications equipment necessary to respond to either a safety emergency or incident, or to a natural disaster. She advised that the vehicle would also be utilized as a community event command post for events such as the July Block Party, Public Safety Expo and Patriot Day Celebration. She reported that since the vehicle was custom built to specific specifications, it could not be purchased through a bid process like conventional vehicles. She stated that the majority of the funding necessary for the vehicle was available through drug forfeiture funds, with additional funding provided through the Urban Area Security Initiative Grant. It was the recommendation of staff that the City Council authorize the purchase of a mobile command post vehicle in the amount of $190,520 and approve an appropriation in the amount of $26,520 to fully fund the project.

Lieutenant Terry Benjestorf, Lakewood Sheriff Station, stated that having access to a centralized command center that could be located at the site of major incidents, natural disasters or major crime scenes and was equipped with advanced communication technologies would not only improve response, but would also demonstrate to the community the City’s level of readiness.

Responding to a question from Council Member DuBois, Lt. Benjestorf stated that the unit’s ability to generate power was limited only by the size of the gas tank and that with sufficient fuel reserves, the vehicle could generate its own power indefinitely.

Ms. Ruyle confirmed for Vice Mayor Van Nostran that the vehicle would be equipped with theft deterrent systems.

Mayor Esquivel opened the public hearing at 7:45 p.m. and called for anyone in the audience wishing to address the City Council on this matter. There was no response.

He reported that experts had determined that there was additional space in the Basin for the storage of groundwater and that the City had participated in a cooperative effort to establish a process for the use of this space. He noted that although that effort had stalled, the California Department of Water Resources was in the process of restarting negotiations and that it was important for the City to reaffirm its position that the groundwater supply be protected for the service of local water customers. It was the recommendation of staff that the City Council adopt the proposed resolution, appropriate $300,000, and authorize the potential purchase of water for storage in the Central Groundwater Basin.

She reported that the City had received approval through the California Office of Emergency Services for $45,000 toward the purchase of an Emergency Communications Command Vehicle and $13,000 for a year of maintenance on the Tele-Works First Responder system. It was the recommendation of staff that the City Council authorize the expenditure of Urban Area Security Initiative Grant funds as indicated.
