The Director of Community Development, Chuck Ebner, displayed slides and gave a brief oral presentation based on the memorandum in the agenda packet stating an application had been received from Grace Hu for approval of Tentative Tract Map No. 53949, to construct a 20-unit residential condominium project. The subject site, which was zoned for multiple family residential, was located at 20741 through 20899 Seine Avenue and would require the demolition of nine existing dwelling units. He reviewed the requirements contained within the Lakewood Municipal Code for this type of development and stated there was adequate on-site parking and that it was under the maximum density limit for the size of the site. He advised that to be in compliance with the General Plan, a road dedication of 2 1/2 feet would be required along the alley on the westerly side of the project site. He also stated that a Mitigated Negative Declaration had been prepared for the project. It was the recommendation of the Planning and Environment Commission that the City Council hold a public hearing and approve Tentative Tract Map No. 53949.

Responding to a question from Council Member Wagner about parking, Mr. Ebner stated that the Lakewood Municipal Code’s requirement of 2½ on-site parking spaces per unit was in line with requirements of other cities. Mr. Ebner also stated that although there had been some concerns about parking in the area in the past, the newer projects were not generating parking complaints and this project would have a homeowners’ association to deal with any on-site parking problems.

The Community Development Director displayed slides and gave a brief oral presentation based on the memorandum in the agenda stating the City Council had previously approved a General Plan Amendment and Zone Change for a project by the Olson Company to be located at the southwest corner of Paramount Boulevard and Candlewood Street. The next step in the process was the approval of the Precise Plan of development for the project. He reviewed the elevations and floor plans and noted that the high level of detail was required of a precise plan. He reported that the Precise Plan was within the scope of work described in the Mitigated Negative Declaration and the Precise Plan had been found by the Planning and Environment Commission to be in conformity with Section 9472.4 of the Lakewood Municipal Code. It was the recommendation of the Planning and Environment Commission that the City Council hold a public hearing on the Precise Plan for the Candlewood Walk 20-unit, single-family planned unit development and introduce Ordinance No. 2003-6.

He advised that the project was scheduled for completion in November and pricing would begin in the low $400,000 range.

Council Member Wagner inquired about the locations of walls and gates. Mr. Bestley responded by stating that there would be a wrought-iron fence across the front of each home separated by 36-inch pilasters and that there would be a six-foot, wrought-iron fence with a security gate around the open space area.

Lieutenant Mark Weldon, the City’s “Team Lakewood” lieutenant, reported that the system would provide state-of-the-art technology that would be used by the Sheriff’s Department to capture and enhance video from surveillance cameras.
